

FM/UL-Resilient Seated Gate Valves & Indicator Post

Fire fighting Resilient seated gate valve with a soft seal disc which is fully encapsulated with rubber. The valve is designed with new technology for light operating, no clogging and no corrosion, good resilient memory & long service life. It can be used extensively in all kinds of water supply & sewage, fire-fighting and function as a shut-off or regulation valve.

Features:

- Newly advanced design, less operation torque & abrasion resistance.
- Body & Cover are made of high grade Ductile Iron.
- Forged stem provides stronger stem operation and less moving parts.
- Disc is covered by high-grade rubber, which complies with drinking water.
- High-tech rubber curing with precise geometry dimensions, more resilient & strong adhesive to ductile casting.
- The O-ring stem seals are designed to prevent stem leakage. and provide replacement of the O-ring without disassembling of valve from mainline pipes.
- Both inside & outside are coated with epoxy resin powder.

Field Services:

Fire fighting system.

Technical Data:

Size Range: DN50~DN300mm(2"-12")

Working Pressure: 250/300 PSI

Working Temperature:-10°C- 80°C

Flow Media: Water

Flange Ends Connection: AISI B16.1 and PN16

Grooved Ends Connection: AWWA C606

Address: 272 Bath Street Glasgow G2 4JR **Cell:** +44 (0) 776348 8809: **Land:** +44 (0) 1369 760423
